Hook Lift

S 8

Impact tested head board

Radio remote control

Hook Lift S 8 is a flexible, easily operated and fast hook lift. Our design offers one of the lowest build heights and self-weight available on the market today while the lowered tip axle increases the lifting force.

Hook Lift S 8

- 8 metric ton lift and tip capacity.
- Adapted for 2 axle chassis.
- Robust design for increased strength and long life.
- Automatic lowering brake that dampers the speed during the final phase of the lowering movement.
- Hook height of 930 mm and adapted for "mini platforms".
- Extensive option range designed for just your requirements.
- Apart of our construction concept FBS, which comprises corrosion-resistant products (ready-painted during assembly). FBS also gives shorter lead times.
- As a customer you benefit through many years of profitable ownership.

Options

- Radio remote control
- Crane platform studs
- Tank, valve and tool brackets
- Impact tested head board
- Sleeves in the head board

Our products have always promoted safety and user friendliness. The hook lifts include numerous parts and components that increase safety for the driver and facilitate operation.
