Hydraulic load securing

Container stop

**Skip Loader TL is the classic telescopic lift from Lessebo with several practical and unique characteristics.**

### Skip Loader Telescopic – TL

- 8 metric tons lifting capacity.
- Adapted for 2 axle chassis.
- Robust design for increased strength and long life.
- Separate operation of the arm extension and extendable arms (operates in environments with low sealings)
- Optimised weight for increased net load.
- Rapid working cycle.
- No height limitation on account of the boom-less design
- Extensive equipment range designed for just your requirements.
- Electronic pneumatic cab operation with 2 metre cable for lift and tip hook functions.
- Radio controlled with 2 speeds, one-handed operation, emergency stop and holder with integrated charger available as an option.
- Prepared for Cameleont swap system.
- Apart of our construction concept FBS, which comprises corrosion-resistant products (ready-painted during assembly). FBS also gives shorter lead times.
- As a customer you benefit through many years of profitable ownership.

### Options

- Radio remote control
- Exterior hand throttle
- Wear plate or Hardox on platform
- Hydraulic load securing
- Manual load securing
- Lifting hookeye
- Container stop
